- Income (Optional)

- Skills/ Experience:

  - Frequency on using:

    - Computers

    - Social networks

    - Web applications.

Fill Acceptance Sheet.
Ask tester to sign the Acceptance sheet.

Experimental Introduction (with Ethical considerations)
"Remember in every moment that you participation is absolutely voluntary and you can stop at any time you wish.

It's also very important to me that you understand that we are testing the site, no your skills. So, every problem you detect, every task you don't know how to do or that you feel confusing, it's a change for us to improve the application.

Hence, it would be very useful for me if you could think-aloud meanwhile you are using your task."

Read instructions
"Your friend Mike has told you about a web page called PicChallenge. Here, there is a challenge every week in which you have to send a fun pic of a specific category. You and the rest of participant after each challenge vote for the best pic.

He also told you what the current challenge is about, and you have decided to participate.

You have already done your photo, and you have stored it on the following path: Desktop\PicChallenge\Picture1.jpg.

I ask you to participate in the whole current challenge, and think-loud meanwhile you are doing it."

Post-test Interview

This interview should contain at least the following points:

From 1 (nothing) to 5 (totally), could you tell me how much do you agree with the following questions:

Do you consider the task is well managed?

Do you consider the task is easy to follow?

Do you consider the task is easy to remember?

Is it a task I have felt comfortable with?

Another additional comments about the application.

Thanks

Thank user for the help.
